

Terminal Server, Citrix, and .NET

Questions? Call us at (855) 272-7638 and ask for the I.T. Team, or email itsupport@bsasoftware.com.

BS&A Software is proud to announce that their popular suite of .NET applications now supports the use of Microsoft Terminal Server. BS&A has tested and is satisfied with this environment from a standpoint of both speed and compatibility.

While there are no known incompatibilities between Citrix and our .NET applications, BS&A has not tested and cannot currently recommend it.
