BS&A software has a contract with the State of Michigan to collect all personal property data throughout the state. This document is designed to walk you through the process of getting your data out to the FTP site.

## .NET Users:

1. Please be in your 2018 database.
2. Check your license file to make sure it is correct. If it is not correct, your database will not get uploaded properly into the FTP site. Go to Help>About and look under "This product is licensed to:". If it is not correct, you will need to contact Assessing Support immediately.

Once you confirm the license file is correct, you can start the export process.

- Verify that the Revenue Sharing Code is set correctly for the Governmental Unit for the database. This is located within Program Setup>Database Setup>Governmental Units.
