

Hardware Requirements for MMSVP Web Services

Questions? Call us at (855) 272-7638 and ask for the I.T. Team, or email itsupport@bsasoftware.com.

These requirements are subject to change.

The MMSVP Web Services allow BS&A Software's Assessing .NET application to calculate fields based on values provided by Marshall & Swift. This needs to be installed once per municipality. These requirements are in addition to our current hardware requirements found here: <http://bsasoftware.com/Technology/Hardware-Requirements>

Additional Hardware Requirements

No Additional Processor needs

2 GB RAM

5 GB free disk space

Windows 7 (or newer) for desktops and Server 2008 (or newer) for servers

Additional Software Requirements

A local version of Internet Information Services (IIS) will need to be installed. If IIS already exists, the MMSVP installation process will add missing features as needed.

Multiple databases will also be restored to an additional SQL instance. SQL 2008 R2 Express or newer is required.
